Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I in Paper No. 3 is acknowledged. The traversal is not supported by filed arguments.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 11-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected Group II, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 3.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1, 3, 5, 7, 8 , 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Wolf et al. ("Silicon Processing for the VLSI Era Vol: 1 Process Technology", Lattice Press, Sunset Beach, CA, USA, pp. 143-145, 1986.)

Art Unit: 1765

Wolf et al. disclose a pattern on an epitaxial layer substrate. (see Fig. 19) The substrate is seen to have a bottom dimension marked with endpoints c and d. The top of the pattern is not marked but can be seen to have a larger dimension than that defined by c and d. The shape of the second pattern defines a line segment as does the first. Epitaxial pattern shift, distortion, and washout are described in Fig. 19. The endpoints are separated features which define the maximum and minimum vertical and horizontal dimensions in each case. The sloped sidewalls are seen to define progressively decreasing dimensions.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 2, 4, 6, 9, 10, 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wolf et al. as applied to the claims above.

Wolf et al. is disclosed above.

Wolf et al. does not explicitly disclose the claimed L-shaped pattern.

It would have been obvious to one of ordinary skill in the art at the time of the present invention to use other shapes as the pattern as these are obvious design choices not limited by the product itself. Motivation to alter Wolf et al. was

found in the suggestion there in to perform empirical studies to work out pattern requirements for epitaxial processes.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew A. Anderson whose telephone number is (703) 308-0086. The examiner can normally be reached on M-Th, 6:30-5.
